My outage essentials

Picture a Dallas-Fort Worth summer afternoon or winter evening without power. Which needs change with the season, and which stay the same?

What would I keep running?

Examples: a fan on a hot afternoon, heating controls in winter, a router at night.

Appliance, device or room	When do I need it?	Target hours

If I could keep only one of these running, I would choose _____

What is already at home?

Check everything you already own.

☐ Solar panels ☐ Gas generator ☐ Home battery ☐ None ☐ Not sure

Equipment model, if known _____

Project budget _____ **When would I like it ready?** _____

What should I ask an electrician?

How would my summer and winter priorities change which circuits merit review?

My question _____

_____
